The Information Technology Cybersecurity program combines systems administration fundamentals with the requisite security concepts and effective practices required to implement, administer, and harden operating systems.

Outcomes:

- **x** Demonstrate the ability to install, configure, manage and troubleshoot a small office or home office network (wired or wireless).
- **x** Demonstrate the ability to secure wired and wireless networks.
- Demonstrate the ability to install, configure and manage client and server operating systems.
- Demonstrate the ability to harden servers against intrusion.
